Hi Joyce,

Per our discussion – we spoke with Butch Knowlton at approx. 11am on 8/6. He said that major irrigation ditches were shut down and that major users have shut their gates. He specifically mentioned Glacier District, that they had concerns or specific issues (I didn't write down what) but whatever the exchange, he was going to followup with them. We discussed sampling and relayed that we had teams out but that we were having trouble getting in contact with them. It was also on that call he asked if we could partner with them to fly the river and aerial imagery. We said we would be agreeable to that but that we'd have to figure out the right mechanism (we ended up using ASPECT). We also talked about Durango's water treatment plant and the amount of water they had in reserves. Cheers, G
